## HD，HS Series Knife Switch

## 1 Overview

HD series，HS series knife switch（hereinafter referred to as switch）is used in the complete set of AC 50 Hz power distribution equipment with the rated operating voltage up to 690 V and with the rated operating current up to 3000 A as infrequent manual connection and disconnection circuit or as a disconnector．Among them：
1．1 The central handle type knife switch is primarily used in the power station as a switch disconnector not used to cut off a circuit with current．
1．2 The side front lever operating mechanism switch is mainly used in the switch cabinet for front operation and front With maintenance，and the operating mechanism can be installed on both sides of the cabinet．
1．3 The central front lever operating mechanism type switch is primarily used in the switch cabinet for front operation and rear With maintenance，and the operating mechanism is installed at the front side．
1．4 The side operated handle type switch is primarily used in power boxes．
1．5 The switch equipped with an arc extinguishing hood can cut off the appropriate current load，and other series of knife switches are only used as switch disconnectors．

2 Type Designation

Notes：1．The BX rotary operating mechanism is available only for HD13 and HS13，and the wiring method is optional only for HD11 and HS11；
2．Please specify the model，features，voltage grade，current grade，number of poles，operation mode，and quantity of the switch when ordering；
3．Order example：To switch HS13 switch， 250 frame，rated current 250 A ，three poles，with arc extinguishing hood，rotary operation， 10 units
Please specify HS13BX－250／31 10 units．
Note：1．The 2000A，3000A shell frame product with an arc extinguishing hood adopts copper double busbar structure （single－phase double copper busbar），and the product without an arc extinguishing hood adopts single copper busbar． There are differences between the single copper busbar products and the double copper busbar products in the outline and installation dimensions；
2．The outline and installation dimensions of $\operatorname{HD}(\mathrm{HS}) 13 \mathrm{BX}-2000,3000 / 31,41$＂double copper busbar type＂products are shown in the sample figure 12 and table 13.
3．The outline and installation dimensions of the＂single copper busbar type＂product see the corresponding chart．

## 3 Technical Parameters

|  |  |  |  |  |  |  | Tab |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Basic informaiton |  |  |  |  |  |  |  |
| Frame rated current | 250 | 400 | 630 | 1000 | 1600 | 2000 | 3000 |
| Number of poles | 2P，3P，4P |  |  |  |  |  |  |
|  | 50 |  |  |  |  |  |  |
| Rated operating voltage Ue（V） | 415／690 |  |  |  |  |  |  |
| Rated insulation voltage Ui（V） | 1000 |  |  |  |  |  |  |
| Rated impulse withstand voltage Uimp（kV） | 12 |  |  |  |  |  |  |
| Rated operating current Ie（A） | 200250 | 400 | 600630 | 1000 | 15001600 | 2000 | 3000 |

| Accessory informaiotn |  |  |  |  |  |  |  |
| Handle／operating mechanism | －（Standard） |  |  |  |  |  |  |
| Arc extinguishing hood | $\square$（Optional） |  |  |  |  |  |  |

## HD，HS Series Knife Switch

## 4 Operating Conditions

4．1 The upper limit of the ambient air temperature does not exceed $+40^{\circ} \mathrm{C}$ ，and the lower limit is not below $-5^{\circ} \mathrm{C}$ ．
4．2 The altitude at the installation site does not exceed 2000 m ．
4．3 Humidity：When the maximum temperature is $40^{\circ} \mathrm{C}$ ，the relative humidity of air does not exceed $50 \%$ ． A higher relative humidity is allowed at low temperatures，such as up to $90 \%$ at $20^{\circ} \mathrm{C}$ ．Special measures are taken for condensation occurred occasionally due to temperature changes．
4．4 The Pollution degree of the surrounding environment is Level 3；
4．5 The switch shall be vertically installed in a place where there is no obvious shaking，impact vibration and rain and snow immersion and where there is no explosive danger medium that there is no gas or dust sufficient to cause metal corrosion and damage to the insulation．
