

99T1 Series Analogue Panel Meter

1 Overview

99T1 series meter is of the electromagnetic type or magnetic-electric type, and uses a repulsive structure. The meter consists of a measuring mechanical and an indication device. The housing is made of ABS engineering plastic with good insulation and wide visual field, and the values can be easily read.

2 Technical parameters

| Product name | Spec. | Measurement range | Accuracy grade |
|--------------|--------|--|----------------|
| AC ammeter | 99T1-A | 1A-30A (directly connected) 5A-10kA/5A/1A (external device) | Grade 2.5 |
| AC voltmeter | 99T1-V | 15V-600V (directly connected) 380V-450kV/100V (external device) | Grade 2.5 |
