

TGM3E Series Moulded Case Circuit Breaker

- 1 Body
- 2 Flame arresting chamber (optional to customers)
- 3 Plug-in type (optional to customers)
- 4 Flash barrier (standard)
- 5 Zero flashover cover (optional to customers)
- 6 Undervoltage release (optional to customers)
- 7 Shunt release (optional to customers)
- 8 Alarm contact (optional to customers)
- 9 Auxiliary contact (optional to customers)
- 10 Front panel connection transition plate (optional to customers)
- 11 Electric motor operating mechanism (optional to customers)
- 12 Rotating handle operating mechanism (optional to customers)
- 13 Communication shunt alarm accessory (optional to customers)
- 14 Four-remote communication accessory (optional to customers)

TGM3E Series Molded Case Circuit Breaker

1 Product overview

TGM3E series moulded case circuit breaker (hereinafter referred to as circuit breaker) is one of the new circuit breakers researched and developed by us with international advanced technology. It has the characteristics of four sections of selective protection, zero flashover, high breaking, box-type accessories, small and compact structure, green and environmental protection.

By rated limit short-circuit breaking capacity (Icu), the circuit breaker is divided into M type (relatively high breaking) and H (high breaking). It is an ideal product for power distribution and motor protection. It has the rated isolation voltage of 1,000V. It can be used for occasional circuit switch and startup of motor in circuits under AC 50/60Hz, with the rated working voltage \leq 690V and setting current of 12.5A-1,250A.

The circuit breaker can be equipped with communication modules, so as to upgrade the original circuit breaker to a communication circuit breaker easily, achieving “four remote” functions, namely remote control, remote adjustment, remote measurement and remote signaling.

The circuit breaker has the functions of overload long-time delay, short circuit short-time delay, short circuit instantaneous action and ground protection. Undervoltage, shunt, auxiliary, alarm and communication accessories are optional to the product.

This series circuit breaker may be installed vertically (i.e., vertical installation) or horizontally (i.e., horizontal installation).

It has isolating function, with the corresponding symbol of:

Note: 3P+N type without isolating function has a unique “overload alarm without tripping” function, to ensure the continuity of power supply.

The circuit breaker shall meet the standard: IEC 60947-1 and IEC 60947-2.

2 Type designation

TGM3E Series Moulded Case Circuit Breaker

Table 1

Code	Statement	Example
Type A	N pole is not equipped with over-current tripping element, has been connected with all along, and does not act with other three poles	3N300A
Type B	N pole is not equipped with over-current tripping element, and acts with other three poles (N-pole turn on prior to turn off)	4300B
Type C	N pole is equipped with over-current tripping element, and acts with other three poles (N-pole turn on prior to turn off)	4300C
Type D	N pole is equipped with over-current tripping element, has been connected with all along, and does not act with other three poles	3N300D

View of codes of 4-pole product

3 Normal working conditions and installation conditions

- 3.1 Ambient air temperature is -5°C to +40°C;
- 3.2 The relative air humidity at the installation site shall not exceed 50% at a maximum temperature of +40°C. A higher relative humidity is allowed at the lower temperature. For example, the relative humidity can reach 90% at 20°C. Special measures should be taken to deal with occasional condensation due to temperature changes;
- 3.3 Pollution class is 3;
- 3.4 The circuit breaker is required to withstand mechanical vibration with the frequency of 2Hz-13.2Hz, displacement of $\pm 1\text{mm}$ and mechanical vibration with the frequency of 13.2Hz-100Hz and accelerated velocity of $\pm 0.7\text{g}$;
- 3.5 The installation category is III for main circuits of the circuit breaker and II for other auxiliary circuits and control circuits;
- 3.6 The circuit breaker shall be applicable to electromagnetic environment B;
- 3.7 Hot and humid band type (TH type) circuit breaker can withstand the effect of damp air, salt mist, oil mist and mold;
- 3.8 The circuit breakers should be installed in a place without explosive hazard, conductive dust and corrosion against metal and damage to insulation;
- 3.9 The circuit breaker shall be installed in the place without invasion of rain and snow;
- 3.10 Operation conditions:
 - 3.10.1 The ambient air temperature shall be from -30°C to +70°C (derate when the temperature exceeds; see the technical materials in the sample for details);
 - 3.10.2 The characteristic shall not be affected when the altitude is 2,000m (derate when above 2,000 m; see the technical materials in the sample for details);
 - 3.10.3 The ambient air temperature for storage shall be -40°C- +75°C.
- 3.11 The protection grade of the product body is IP20
- 3.12 Cabinet door installation
 - With toggle handle: Protection grade is IP40.
 - With rotation handle: Protection grade is IP50.
 - With motor-operated mechanism: Protection grade is IP40.

TGM3E Series Moulded Case Circuit Breaker

5.2 The application type: Power distribution type

The protection code of power distribution type TGM3E circuit breaker is no by default, with such functions as overload long-time delay + short circuit short-time delay + instantaneous short circuit protection. For example, the selection type is TGM3E - 125M/3300.

(1) Derating factor 1In of circuit breakers with all types of frames at 40°C ;

(2) For TGM3E circuit breakers, the derating factor is determined at the maximum rated current of each frame.

7.4 When the altitude exceeds 2,000m, the electrical performance of the circuit breaker shall be corrected according to the following table:

Table 26

Altitude (m)	2000	2500	3000	4000	5000
Power frequency withstand voltage (V)	3000	3000	2500	2000	1800
Insulation voltage (V)	1000	800	700	600	500
Maximum working voltage (V)	690	690	600	500	440
Working current correction factor	1In	1In	0.94In	0.88In	0.85In

7.5 Recommended tightening torques for the connecting cable/copper bar under different frame currents:

Table 27

Rated current (A)	Front-panel/rear-panel connection torque (N·m)
125/160	8.8~10
250/320	8.8~12
400/630	17.7~22.6
800	28~33
1250	28.8~39.2

7.6 Screw tightening torque

Failure moment (N.m)	15	18	26	33	35	26

8 Accessories

Product internal accessories

According to the needs of users, the circuit breaker accessories can be directly led out with wire (wire length of 50cm. For special requirements, please specify when ordering), or be equipped with terminal blocks (if needed, please specify when ordering).

TGM3E Series Moulded Case Circuit Breaker

- Shunt release (left-mounted and right-mounted)

	Rated control power supply voltage (Us)	AC: AC220/230V, AC380/400V DC: DC24V, DC110V, DC220V
	Action voltage	(0.7~1.1)Us
	Wiring Diagram:	Note: The microswitch in the K-shunt tripper which is in series with the coil inside is normally closed contact; after opening of circuit breaker, the contact is automatically opened; at the closing, it is closed.

When the rated control power supply voltage is DC24V, the shunt tripper can be used directly. The maximum length is 150m for 1.5mm² copper lead (the length of each of the two leads) and 250m for 2.5mm² copper lead. The power at the terminal of the tripper shall meet the minimum power of 50W, or a DC24V intermediate relay shall be used for controlling AC230V or AC400V shunt tripper, and the contact capacity of the intermediate relay shall be no less than 1A.

- Undervoltage release (left-mounted and right-mounted)

	Rated working voltage (Ue)	AC: AC220/230V, AC380/400V
	Action feature	When the voltage is 35%-70% of the rated working voltage, it shall trip reliably. When the voltage is 85%-110% of the rated working voltage, it shall guarantee closing. When the voltage is lower than 35% of the rated working voltage, it shall prevent closing.
	Wiring Diagram:	Note: X- terminal block. Note: (The circuit breaker internal accessory wiring diagram is in the dotted box.)

Attention: The undervoltage release must be energized first in order to re-buckle and close the circuit breaker, otherwise it will damage the circuit breaker.

- Auxiliary contact (left-mounted and right-mounted)

	Fram rated current	I _{nm} ≤320A		I _{nm} ≥400A	
	Conventional heating current I _{th}	3A		6A	
	Use category	AC-15	DC-13	AC-15	DC-13
	Working voltage	AC380V/415V	DC110V/250V	AC380V/415V	DC110V/250V
	Rated working current	0.3A	0.15A	1A	0.15A
	Wiring diagram	 F12 ————— ——— F11 F14 —————+——— F11		 F12 ————— ——— F11 F14 —————+——— F11	
Status of the circuit breaker at "Opening" position		Status of the circuit breaker at "Closing" position.			

- Manually operated mechanism:

The outline and installation dimension of the rotating handle are shown in following figures and table:

Table 29

Model and specification	TGM3E-125/160	TGM3E-250/320	TGM3E-400/630	TGM3E-800
Installation dimension (H)	61	57	87	87

- Alarm contact (left-mounted and right-mounted)

	Conventional heating current Ith	3A
	Rated working current Ie	Same as auxiliary contact
Wiring Diagram:		
		
The circuit breaker is at free release (alarm) status. Status of the circuit breaker at "Opening" and "Closing" position.		

Product external accessories

- Electric Motor operating mechanism:

It is mounted on the panel of the circuit breaker, and is used for the remote closing, disconnecting and reclosing of the circuit breaker electrically. It is suitable for automatic control. See Table 8 for the outline dimension of the motor-operated mechanism

Input voltage	AC220V/230V, AC380V/400V, DC220V/230V	
Wiring diagram		Note: P1 and P2 are inputs of external power supplies. SB1 and SB2 are operation buttons (prepared by users) Note: The wiring diagram of internal accessories of motor-operated mechanism is in the bashed box.

Electronic accessories of the product

According to user demands, electronic accessories of the circuit breaker can be divided into shunt alarm communication accessory, four-remote communication accessory and communication LCD components.

- Shunt alarm communication accessory

It is mounted on the side of the switch, and is used to realize the remote communication of the circuit breaker, remote shunt tripping and alarm signal output of the circuit breaker. It is suitable for intelligent automation circumstances. See Table 29 for outline dimension of accessories.

TGM3E Series Moulded Case Circuit Breaker

·Four-remote communication accessory

It is mounted on the side of the switch, and is used to achieve the “four-remote” function of the circuit breaker together with the auxiliary alarm accessory and motor-operated mechanism, i.e., remote control, remote adjustment, remote measurement and remote signaling. It is suitable for intelligent automation circumstances. See Table 31 for outline dimension of accessories.

10 The protection characteristic curve of the circuit breaker

TGM3E Series Molded Case Circuit Breaker

11 Setting of factory parameters of intelligent controller of the circuit breaker

Setting value of factory parameters

Table 35

	Protection type		Power distribution protection		Motor protection	
4	Overload long-time delay	Setting current IR(A)	In			
5		Time delay tR(s)	60/64 (1250 custom-made)		100/96 (1250 custom-made)	
6	Short circuit short-time delay	Setting current Isd(A)	8 (XI _R)		10(XI _R), Note:1250:8(XI _R)	
7		Time delay tsd(s)	0.3			
8	Instantaneous short-circuit	Setting current II(A)	Inm≤630A	12 (XI _R)	14(XI _R), Note:1250:10(XI _R)	
			Inm≥800A	10 (XI _R)		
9 (standard for pre-alarm type; and optional to other types)	Pre-alarm	Setting current IP(A)	0.9 (XI _R)			
	Current unbalance protection	Setting current Iunbal(A)	50 (XI _R)			
	Ground protection	Setting current Ig(A)	Close			
	Neutral pole protection	Setting current IRN(A)	Close			
Thermal simulation function		Close				

12 Ordering instructions

Please specify following matters when ordering:

- a) Model, name and pole number of the circuit breaker.
- b) Rated current of circuit breakers.
- c) Accessory name, specifications and combination code of the circuit breaker (the working voltage shall be specified for shunt tripper and undervoltage tripper).
- d) Usage: For power distribution (be delivered as for power distribution by default if not specified) and for motor protection (represented by 2).
- e) Quantity.

For example: 20 sets of TGM3E-250, 3-pole, 50kA, 250A, with shunt release, AC 400V. Fill in: TGM3E-250M/3301250AAC400V 20 sets.

For special requirements to the circuit breaker, please negotiate with the manufacturer.

13 Examples of rapid selection

- a) TGM3E-125M/3N300A125A:
i.e., order a TGM3E series electronic circuit breaker for power distribution protection, with 125A frame, 50kA (relatively high), rated current of 125A, 3-pole and 4-wire (i.e., 3P+N), without null line protection.
- b) TGM3E-125M/33002125A:
i.e., order a TGM3E series electronic circuit breaker for motor protection, with 125A frame, 50kA (relatively high), rated current of 125A, 3 poles.
- c) TGM3E-125H/3N300AE1W125A:
i.e., order a TGM3E series electronic circuit breaker for distribution protection, with 125A frame, 85kA (high breaking), rated current of 125A, 3-pole and 4-wire (i.e., 3P+N), with three-knob controller equipped with zero arc accessories, without null line protection. Remarks: For special customized products, please consult us firstly.

TGM3E Series Molded Case Circuit Breaker

14 Description of the selection table of TGM3E series moulded case circuit

Model	TGM3E	M	Z	/	4	3	00	2	A	F	E1	125	AC230V	B	Plateau	
Shell frame -level current	125: 125A	Operation mode	Tripping mode	Pole number	3:	3 poles	3:	3 poles	N pole code	Additional information	Alarm module	Controller code	Rated current	Voltage of accessories	Applicable situation mode	Special requirements
TGM3E electronic moulded case circuit breaker	M: relatively high	F: Direct operation	10: shunt release 20: auxiliary contact Under-voltage release 40: shunt release + auxiliary contact	3N : 3P+N	Z: rotating handle operation	4: 4 poles	P: motor operation	125: 32A 63A 125A	Default: Pre-alarm controller	Default: Overload alarm release	Default: Conventional application	Default: Flash barrier	w : Zero flashover	Handle lock		
	H: high breaking	250: 250A	60: two sets of contacts + auxiliary contact 70: under-voltage release + auxiliary contact 90: A current contact					125: 32A 63A 125A	Default: Fixed front-board wiring	Default: Fixed rear-board wiring	Default: Fixed rear-board wiring	Default: Fixed rear-board wiring	W : Zero flashover			
		320: 320A	18: shunt release + auxiliary contact 28: auxiliary contact + alarm contact 38: shunt release + alarm contact 48: shunt release + auxiliary contact					160: 63A 125A 160A	III: Overload alarm without tripping	E1: Three-knob controller	250: 250A	250: 250A	E2: Current unbalance type controller	E3: Grounding type controller		
		400: 400A	68: two sets of auxiliary contacts + alarm contact 78: under-voltage release + auxiliary contact + alarm contact					160: 63A 125A 160A	F: Prepayment	160: 63A 125A 160A	320: 320A	400: 400A	630: 630A			
		630: 630A							C: four protective poles. Null line is broken with other poles					800: 630A 800A	E3: Grounding type controller	
		800: 800A							D: four protective poles. Null line is not broken with other poles.					1250: 1250A
